[Virtual Doxx](#) is pleased to integrate **Ricoh's** full line of document scanners that deliver unsurpassed image quality, speed, and advanced paper handling to meet the needs of any user in a workgroup or departmental environment for converting paper documents to digital computer images.

Incite Systems 's eMedForce.com offers a ONE STOP software solution for your practice needs. We eliminate the pain of practice management by being a virtual IT partner for all their IT needs. Doctors today get bounced around between various fragmented software and hardware providers making it harder for the practice to adopt & maintain technology. With eMedforce.com, doctors can have the peace of mind of not worrying about IT issues. Your IT support is just a click away.

Imagine a solution where you don't have to install software, server, and backup. It would include Scheduling, Eligibility, Billing, Online Claim Status Check, Charting, eLab, eRx, eRad, eFax, eMail, Time Card, Revenue Management, Custom website to promote your business and handle routine patient matters in a secure way. This would come with hardware, network and Internet security support, which is available as email, chat or phone. Most of all you can try these before you buy and it is affordable.

For reseller and partners, our software is easy to implement, we offer continuous education and technical sales support so you can focus on the account management and leave the technology to us.

Incite provides these unmatched capabilities to VirtualDoxx dealers

## PAXAR

**Paxar Corporation** is a global leader in **RFID, 1-D and 2-D bar code solutions**, and provides [Virtual Doxx, LLC](#) with the expertise needed to help [Virtual Doxx](#) dealers provide robust bar code and RFID solutions associated with records, item, inventory and asset management. [Virtual Doxx's](#) robust database architecture enables business process applications fully leveraging the benefits of bar code and radio frequency technologies.

By their very nature, data assets require organization. The Elin Group, LLC brings over 25 years and worldwide experience to the art of records classification, retention and regulation compliance, and can assist dealers in supporting their customers needs for optimizing the life-cycle management of their diverse information assets. The Elin Group, LLC is worldwide **'Records Management Consultancy'** to Johnson & Johnson and has a blue chip client list across essentially all paper-intensive vertical markets. [Virtual Doxx, LLC](#) is pleased to offer advanced records management consulting and implementation services, including HIPPA and Sarbanes-Oxley compliance, from a true leader in records management excellence.

There is no bigger name in **imaging and high speed document capture** applications, and no scanner has a better reputation for industry-best paper handling. **Kodak** is well known for its high speed document scanners that have dominated the high-end of the imaging market since its inception, and **Kodak** has recently released a full-line of low to mid-range scanners to meet the imaging needs from the single user to worldwide enterprises.

**Vanguard Voice Systems** is the leader in **structured voice data capture** solutions! Virtual Doxx and its valued resellers can architect advanced vertical market solutions by customizing business processes to use voice versus keyboard for data entry *right into a database --- not just a voice file or a free text 'blob'!* There are many applications where voice is the ideal data input methodology, and pundits now and from the birth of computing have always predicted that the ultimate human-computer interface is voice, because that is easiest and therefore brings maximized efficiencies to a business process solution.

## PDF-SOLUTIONS

**PDF-solutions** is Virtual Doxx's valued document imaging expert! Whether an end user needs a back-file **document-to-image conversion** or a dealer needs to 'learn how to run an imaging shop', **PDF-solutions** is the answer for the filing systems and records management industry! In addition to standard document conversions for legacy files and/or for active business process support, PDF-solutions converts and creates index databases for engineering drawings, microfilm-to-digital conversions, and other advanced media and data conversion services, including domestic and off-shore data entry.

GLED specializes in providing turnkey IT solutions for ISVs, education, government, major end users and resellers that have repeatable needs of IT hardware and services.
